Note: This primary clutch can also work with Sportsman 500. The only difference are the flyweights. Sportsman 700 or 800 flyweights are heavier, and therefore, have to be swapped with flyweights from the Sportsman 500 clutch into the Sportsman 700 or 800 clutch. The Sportsman 800 clutch has smaller diameter in the one-way roller bearing which gives it more low end power and faster rev than the 500.
