Description For 33cc, 36cc, 43cc, 49cc Gas Scooters

\*Bolt Hole Spacing: 67mm  
\*Diagonal Bolt Hole Spacing: 95mm

These motors are commonly found on stand-up gas scooters, pocket bikes, mid-bikes, mini-choppers, small ATVs/Quads and small dirt bikes.

Please check the inside of your original stock pull starter to confirm that you order the correct item. This pull start has a black plastic casing which is common on all 2-stroke engine pull starters. Pull mechanism is spring loaded and includes a standard rope/cord.

Mounting screws are not included; you will need to re-use your existing hardware.
