Description

Technical Specification

Battery	72V20AH Lead Acid
Rated Power	500w+
Speed	32km/hr
Range	80km on a Full Charge
Charge Time	6-8 hours
Brakes	Disc/Disc
Tires	90/90-10 Tubeless Tires
Load Capacity	330lbs (150kg)
Dry Weight	254lbs (115kg)
Dimensions (L x W x H)	176cm (69") x 69cm (27") x 112cm (44")
Packing Size (L x W x H)	170cm (67") x 50cm (20") x 105cm (41")

RIDE FREELY.
WITHOUT A LICENSE.

We have created an e-scooter that adheres to the **US2002 Federal law** (Read [point 6 here](#)). It can travel at a maximum speed of 20mph (32kph). It has pedals so you can ride it like a regular bike. Since the GIO e-scooter is not classified as a motor vehicle, you can ride it without a license.

NO INSURANCE. NO GAS.

TOTALLY AFFORDABLE.

A new car could easily cost ten times more than our e-scooter, not to mention the regular maintenance, monthly insurance, and never-ending trips to the gas station. When you buy a GIO e-scooter it's a one-time investment.

A MODERN CLASSIC.

WITH COMFORTABLE SEATING.

The GIO e-scooter has a wider seat. It is very comfortable to sit on. You are less likely to get butt or crotch pain (compared to a bike).

AMPLE STORAGE.

CARRIES UP TO 330 LBS (150 KG).

Each GIO e-scooter is equipped with a seat storage, and an add-on storage at the back.

60 MILES.

IN A SINGLE CHARGE.

A single charge of 6 to 8 hours will produce a range of about 60 miles (100kms). That means you can ride continuously for over 3 hours, at 20mph (32kph).

ADVANCED LOCK AND ALARM SYSTEM.

SECURITY BUILT-IN.

GIO e-scooters feature a rear-wheel lock, a separate front wheel U-lock, and an integrated alarm system. You will be notified right way if someone tries to steal your GIO e-scooter.

This Electric Scooter is shipped 90% assembled, some assembly is required.

This Electric Scooter requires but is not limited to:

- Battery Connection
- Wheel Assembly

- Body Part Assembly

Customers are encouraged to call prior to placing their orders for assembly-related questions.
